JURA ENA micro 9 One Touch

Downsize to simplicity

JURA is proud to present the world's smallest One-Touch automatic cappuccino machine: the new ENA Micro 9 One Touch.

This machine is actually 11% shorter than the compact ENA line. This is down to the newly developed brewing unit, which is perfect for preparing a single cup and ensures top-quality espresso results. Its smaller design helps it make a real impact, which is further reinforced by the stylish Micro Silver color.

Simple Operation

Operation is so straightforward that it can be summed up in two words: Press – enjoy. The easy-to-understand symbols and ergonomically arranged buttons give you exactly what you want without any fuss.

Silicone sealed bean container

The special silicone seal keeps the bean container air-tight. The coffee beans are kept fresh for a longer time. This intensifies the aroma inside the cup.

Revolutionary fine foam technology

Another new development from JURA ensures a unique milk foam quality of a fine, feather-light consistency: fine foam technology.

Wide range of specialities

JURA is really raising the bar and its ENA Micro 9 One Touch offers an impressive range of specialities at the simple touch of a button: latte macchiato, cappuccino, café crème, espresso, hot water serving. The newly developed micro brewing unit ensures espresso quality of the highest standard.

1 Espresso

1 Café Crème

1 Cappuccino

1 Macchiato

1 Tea
