Click & Drink

Select, press, enjoy. The IMPRESSA C5 is based on a simple one-switch philosophy. You can achieve perfect coffee results in a correspondingly short time, and to a standard that has already won over critical independent testers.

Thanks to its compact design, it is easy to find a space for it anywhere, while its clear shapes and colours have an attractive appeal.

Energy efficiency and enjoyment don't have to compete with one another.

Eco-intelligence

The patented Zero-Energy Switch disconnects the machine completely from the mains supply. This means that the IMPRESSA C5 does not consume any energy in standby mode.

Attractive control philosophy

Thanks to the one-switch philosophy with the smart Rotary Switch and the easy-to-understand symbol display, you are just one touch of a button away from enjoying the perfect cup of coffee.

Connector System©

The Connector System© allows you to use the Easy Cappuccino Frother, the hot water nozzle, and the optional 2-stage frothing nozzle or the Professional Cappuccino Frother to make perfect milk foam or hot milk.

Height-adjustable coffee spout

Whether it's a small espresso cup or a large one for your breakfast coffee, the height of the coffee spout can be adjusted continuously to between 65 and 111 mm and fits any size of cup
