JURA IMPRESSA J5 - As good as it gets

Total enjoyment, perfect aesthetics

The uncompromising all-round design of the IMPRESS J line is a feast for the eyes of any aesthete. Gourmets are enraptured by the prospect of being able to make any kind coffee they wish and experience new dimensions in enjoyment with ristretto, espresso, café au lait, cappuccino, latte macchiato and many other popular specialities. Preparing them is a snap, because the innovative operating system couldn't be easier to master. And the integrated cup illumination system puts the spotlight on every coffee you make.

Breathtakingly beautiful

Clear, uncluttered lines and first-class materials are integral to the design of the IMPRESSA J line. Every single detail is precisely thought out and fuses with the others to form a consummate aesthetic whole. All this makes the IMPRESSA J line a genuinely beautiful object so compact it will fit anywhere.

Precisely to your taste

The centrally arranged operating elements with the unique Rotary Switch and a clear text display that speaks your language take you quickly and intuitively to the kind of coffee you want, with the focus entirely on your taste. Simply choose the coffee strength, amount of water and temperature to suit your own personal taste. You even have a choice of three temperatures with the hot water. Accessories like the dosage spoon and the hot water nozzle store conveniently in the special compartment, where they always available.

A perfect result in any cup

JURA is proud to present yet another innovation that helps make coffee that little bit more perfect. For the first time ever, you can now adjust not only the height of the coffee spout but also the width, which means it will fit just about any standard cup. And that guarantees you a perfect result every time. Whether you're using a small, slim espresso cup or a huge cappuccino cup with a large diameter. And because every IMPRESSA is a genuine two-cup, fully automatic machine, it turns out the same perfect results with either one or two cups at the same time. Developing a truly fabulous crema with the kind of consistency found on only the best espresso.

Perfect coffee specialities

The IMPRESSA J line's wide repertoire includes classics like espresso or café au lait as well as popular specialities from cappuccino and latte macchiato through to your own imaginative creations. A variable-volume brewing unit (5–16 grams) plus a wealth of other individual setting guarantee maximum pleasure cup after cup after cup.

Connector System©

This enables you to use the Professional Cappuccino Frother to obtain a perfect milky foam or warm milk, a hot water nozzle for a smooth, even jet of water, and the optional two-speed frothing nozzle.
