Technical data

IMPRESSA key technologies and standards

Intelligent Pre Brew Aroma System (I.P.B.A.S.®)	■
I.P.W.S.® compatible	■
Two cups in a single brewing operation	■
Six-setting grinder	■
High-performance pump, 15 bar	■
Additional pre-ground coffee blend	■
Display dialogue system	■
Water filter display	■
Maintenance programme display	■
Mains switch	■

Key features

Coffee à la carte	■
Two separate heating systems	■
Active bean monitoring	■
Aroma preservation cover	■
Energy Save Mode (E.S.M.®)	■
2-stage frothing nozzle	■
Professional Cappuccino Frother	■
Rotary Switch	■
Cup warming tray	■

Programming

Programmable powder quantity	■
Programmable brewing temperature	■
Programmable automatic switch-off	■
Programmable automatic switch-on time	■
Integrated rinsing-, cleaning- and descaling-programme	■

Capacity

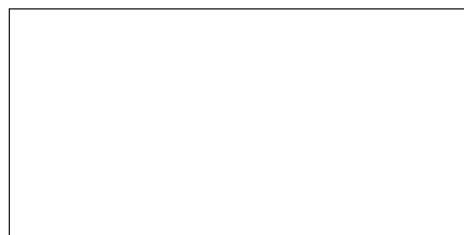

Daily capacity	approx. 50 cups
Volume of bean container	280 g
Optional extension	500 g
Volume of grounds container (portions)	ca. 40
Volume of water tank	5.7 l

Accessories (all optional)

Permanent connection to water supply	■
Milk cooler	■
MDB-Interface	■
Billing systems	■
Catering mobile	■

Facts

Variable-volume brewing unit	5–16 g
Height-adjustable dual-purpose dispenser	66–146 mm
Weight	15.2 kg
Dimensions (W x H x D)	41 x 47 x 39 cm
Cable length	1.1 m
Fuse / Voltage / Power	10 A / 230 V AC / 1350 W
Testing	CE Ⓢ
Article number	13297
Swiss made	■

IMPRESSA Xs90

Art. 65649 – 08/05

IMPRESSA
if you love coffee

IMPRESSA Xs90: A high-performance all-rounder

A touch of a button is all it takes to make one of the seven individually programmable specialities that can be prepared with the IMPRESSA Xs90. Use the professional cappuccino frother to take all the hard work out of making special favourites like Cappuccino or Latte Macchiato. The height of the coffee dispenser is infinitely adjustable, which means you can use virtually any size of cup of glass, and the machine has two separate integrated heating systems to facilitate seamless switching from hot water to steam production and save you time. The powder dispenser holds a second, pre-ground coffee blend to give you even more possibilities.

User friendliness

Integrated rinsing and cleaning programmes guarantee your machine a long and active life. The display dialogue system has clearly legible red symbols that indicate when one of the maintenance programmes needs to be activated. The machine then takes you through the necessary operating and programming steps in a choice of seven languages. Less frequently used programming buttons are discreetly concealed behind a flap. The combination of the elegant cup illumination system with the chrome-plated dispenser perfectly rounds off JURA's hallmark Nordic design.

Precision grinding machine

The process of making an outstanding cup of coffee starts with the grinding of the fresh coffee beans, and the important thing here is the optimum blend of small and large grains. This is guaranteed by the six-setting precision grinder, which is now even quieter thanks to the contribution of a team of sound acousticians. And an active bean level monitoring system ensures that the grinder will never run empty. So it's goodbye once and for all to cups that are only half-full.

Ecological intelligence

Use the machine's energy saving mode (E.S.M.®) to suit the situation: this helps you save energy – and money – without having to give up enjoying genuine coffee specialities. And if you plan not to use the machine for a while, you can use the built-in mains switch to shut off the mains power supply completely.

Capacity

Less is not necessarily always more. And that's why the IMPRESSA Xs90 comes with a 5.7-litre water tank, a container for up to 280 g of coffee beans and a grounds container for up to 40 portions. This makes it ideal for situations where a daily capacity of 50 cups is required.
