## Reads your choice of coffee from your fingertips

The combination of the unique Rotary Switch with the touchscreen operating panel guarantees simple operation and an unmistakable design without all the usual buttons and switches. Use the Rotary Switch to select the desired amount of water and take you smoothly through every step in the programme. Simply turn and push to change the settings to suit your own personal taste.

### Rotary Switch

The revolutionary one-switch philosophy is your direct route to a whole range of coffee specialities, because with the Rotary Switch you have total, instant control, literally at the twist of a wrist.

### Touchscreen display

A gentle touch on the elegant operating panel is enough for the sensors to read the type of coffee you require from your fingertips. And it is all made possible by Sensitive Touchscreen Technology®. Simply let the illuminated symbols guide you and enjoy the simple process of making coffee specialities.

### Easy Select®

Easy Select® gives you coffee à la carte completely to your own personal taste. The touchscreen provides nine programmed coffee specialities while Easy Select® offers two different aroma and temperature levels. This effectively means you have 36 different types of coffee to choose from.

### PLUS X Award

Together, these features clearly had the desired effect on an expert jury consisting of journalists from the German trade press. In 2004, they gave the IMPRESSA F70 the PLUS X award for design and ease of use.
